Collected Knowledge & Wisdom on

Coronavirus COVID19 API

Provides:

This API provides information about global COVID-19 rates by returning number of confirmed cases, deaths, and recoveries for each country.

Key Provisioning: **Pain factor** (*0=ezpz...5=nightmare*): _0_

- No key needed!

Quotas:

- No quotas!

The Good:

- All information is clear and substantial showing daily information for each country as well as total information in https://api.covid19api.com/summary
- Data is updated very frequently.

The Bad:

- In the data for individual countries at https://api.covid19api.com/country/**{country}**/status/**{confirmed/deaths/recovered}** you can only receive information about the status (confirmed, deaths, recoveries) one at a time.

The Ugly:

- Each entry is not space-separated making the data difficult to read over a browser
